

Kill And Cure Pest Control

Information Sheet.

Bedbugs.

Preparation.

- 1) Strip all beds/wash bedding and all quilts .
- 2) Empty any drawers in the bed if it has them.
- 3) Empty wardrobes.
- 4) Empty all other drawers and cabinets.
- 5) Move furniture away from walls.
- 6) Cover all fish tanks, aquarium and relocate small animal cages.
- 7) Clear all floor area's especially under beds.
- 8) Vacuum thoroughly.
- 9) Do not vacuum for 4 weeks following the treatment.
- 10) Soft furnishings and carpets are sprayed clear all floor area's.
- 11)It is recommended that all clothing etc should be stored in knotted/sealed bags until washed/cleaned before returning to treated area's.
- 12)The property should be left after treatment for 4 hours, rooms should be aired before sleeping.

Depending on the extent of the infestation and adherence to the pre-visit preparation it can take one,two or three visits to resolve the issue.

When making appointments for treatment please ensure that you have allowed enough time to follow the preparation prior to the technicians visit.

The technician will not be able to wait whilst the above preparation is carried out.
