NOTE product name removed original available

Dear Mr. Krueger:

Thank you for the microbial solutions your company provided the Baltimore City Public Schools. We have found your product to be effective and recommend the use of the Microbe Shield Program to any facility experiencing microbial contamination problems.

The Microbe Shield Program has provided our school system with a long-term solution in controlling mold, mildew growth and the resulting odors. Our experience has proven that Microbe shield is reasonably priced and the most effective product available to control microbial contamination on virtually any surface.

School facilities with evidence of microbial contamination are now fully functioning, without occupant complaints due to the implementation of the Microbe Shield Program. We are grateful to the Microbe Shield technology and the solution it has provided for our school district.

Jack M. Elam
Building Safety and Education Officer
Baltimore City Public Schools
