

OUR MISSION

At **Care Partners Newbury Ltd**, our mission is to provide compassionate, reliable and person-centred domiciliary care that enables people to remain safely and comfortably in their own homes while maintaining their independence, dignity and quality of life.

We provide flexible care tailored to each individual's needs and preferences. Our services include personal care, medication support, meal preparation, companionship, domestic support and shopping, helping our clients with the things they need while encouraging them to remain as independent and involved in their daily lives as possible.

We believe that every person is unique and should have choice and control over the care they receive. We take the time to understand each client as an individual, respecting their wishes, routines, values and lifestyle. Our flexible approach allows us to adapt our support as people's needs change, rather than taking a one-size-fits-all approach.

Our care is built on **respect, kindness, trust, dignity and partnership**. We work closely with our clients, their families and other professionals to provide safe, consistent and high-quality care that gives people confidence in their own homes.

At Care Partners Newbury Ltd, we are committed to **supporting people, not taking over**. Our aim is to provide the right level of assistance while empowering every client to do as much as they can for themselves, helping them maintain their independence and live life on their own terms.

Our mission is simple: to provide flexible, compassionate care that puts people first and enables our clients to remain independent, respected and valued in the place they call home.
