

Chest Padded Walking Rein

Designed to provide security, guidance and directional aid for children and adults with challenging behaviour or learning difficulties. Using a harness may prevent personal harm by offering a certain degree of restraint. Particularly good for those with a limited sense of safety awareness.

The Chest Padded Walking Rein was specially designed for the very active "escapologist" and is fitted with a chest belt, waist belt & shoulder straps.

It is important for safety reasons that the rein strap is always held behind the child and not pulled from the front.

This ensures the strain is on the very strong webbing belts and not on the PVC chest pad.

The Chest Pad is made from fire retardant PVC and is easy to wipe clean.

IMPORTANT: This harness is not classed as a safety harness

Available in two sizes:

Cat. Ref: **WRCP - 3 to 8 Years**

Will fit a maximum waist measurement of 91cm (36")

The Breaking Load of the Rein Strap is 60kg / 126lbs / 9 Stone.

If the occupant exceeds this weight limit a

Non Detachable Rein Strap is Recommended.

Cat. Ref: **WRCP/ENL - 9 years to Adult**

Will fit a maximum waist measurement of 109cm (43")

This walking rein has a fully adjustable waist belt & chest belt.

Each belt is fitted with a 'Duraflex Side Squeeze' buckle simply operated by squeezing the buckle buttons.

The 'Rein Strap' itself attaches to the 'Rein Attachment Strap' located at each side of the chest pad in between the waist and chest straps.

It attaches by way of two 'Three Way Side Release Buckles'.

These are similar to the above buckle and operated in the same way however the buckle remains secured unless the third button on the face of the buckle is pressed. (All three buttons require pressing at the same time).

When the 'Rein Strap' is detached the 'Rein Attachment Straps' can be secured by simply clipping them together out of the way.

Comfort Sleeves can be added to cover the buckles & hide them from inquisitive fingers. **Cat. Ref: SLEEVE**
