

# Staircaster

Northern Engineering Ltd is the world's leading provider of the Staircaster<sup>®</sup> Mould system within the UK and across the globe. Staircaster<sup>®</sup> is without doubt the most effective and efficient stair mould system on the market today, created and upgraded by Northern Engineering Ltd.

The system is simplicity itself, allowing one man to make the system ready in as little as 15 minutes. Staircaster<sup>®</sup> is a patented design which sets spacing evenly from a single screwing mechanism allowing adjustments to be made using point to point measurements resulting in top quality concrete stairs.

## Benefits of the Staircaster<sup>®</sup> System

- Reduces the need for timber
- Reduces disposal costs
- Saves Stripping time
- Set up time is the same for different stair widths
- No need for highly skilled joiners
- Increased productivity
- Compact Design
- Full installation and training provided
- Major Production Cost Savings

*For more information on this revolutionary stair mould, please contact us at the address below or phone us on the provided numbers.*

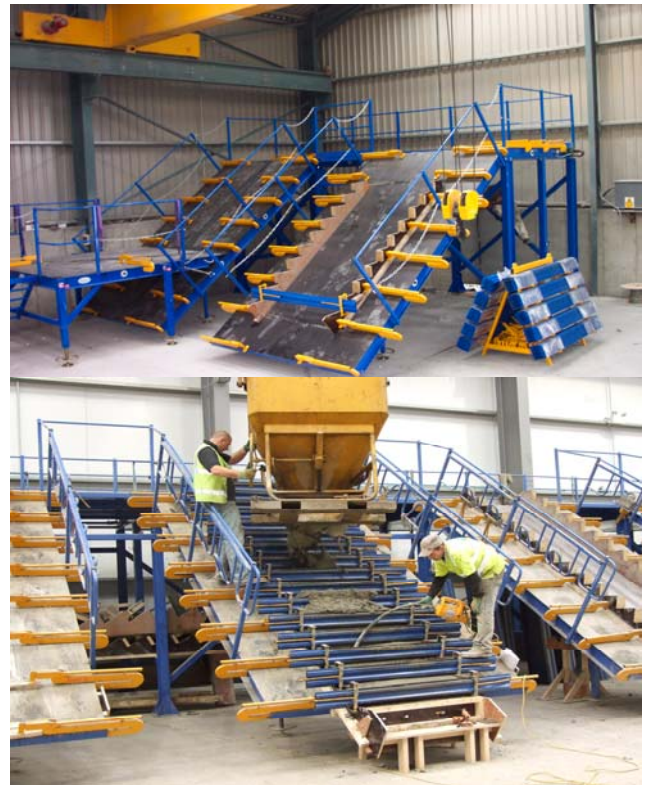

**NORTHERN ENGINEERING LTD**

131 DRUMANEY ROAD, ARDBOE, DUNGANNON, Co. TYRONE. BT71 5BD. **Telephone:** 028 8673 6170 **Mobile:** 07799346898 / 07990570440

# Special Features of the Staircaster Ramp

- **Unique Clamping Systems**  
Allow speedy assembly of the required mould
- **Hinged Bed and Adjustable Legs**  
To achieve the required pitch
- **Safety Handrails**  
Handrails fitted for greater safety and ease of movement
- **Thermostatically Controlled Heating**  
Increase Productivity

## Heated Landing beds

- Reduces the need for timber
- Reduces disposal costs
- The heated mould ensures a daily turnaround
- Time saved in stripping and setting up the mould
