

## CONSERVATORY ROOFS

### PENWORTHAM GLASS LTD

Fed up of being unable to use your conservatory all-year round? Is it too warm in summer and too cold in winter?

Michael Walmsley can provide the solution for you, with his team at Penwortham Glass installing the highly-acclaimed Supalite tiled roof system.

This system can be easily fitted on to existing conservatory window frames.

“In a nutshell it makes your conservatory into a valuable extension of your home that can be used all-year-round,” explains Michael, *right with a roof tile/slate selection.*

The Supalite system has insulation between the tiles and the conservatory, and it is designed to last, coming with a 10-year guarantee, as well as being local authority approved. Michaels says it meets all Building Control criteria to qualify as a proper room.

“Life expectancy for a Supalite roof is 60 years,” states Michael. “If you want to learn more, we would be only too pleased to make an appointment to visit and show you how it works.” There is a choice of tile or slate colours, all tested in the USA,

**Address:** Hall Carr Lane, Longton, Preston,

Australia and Canada in extreme weather conditions.

Large roof vents allow in light and there is a full range of colour-matching fascias, soffits and gutters to suit your windows, plus a choice of internal ceiling finishes – plaster

or tongue-and-groove timber effect.

The Supalite system is easy to install to existing window frames but Michael adds: “We can alter your existing conservatory, provided it has a good, solid base. For example, we can build brick pillars and change your conservatory into an orangery. “We can renew all the window frames and the structure, utilising the original base but saving a fortune. Call me and I will arrange an appointment to suit you.”
