

## Environmental Policy

### **Working to help the Environment...**

#### **Everdell's Plastering and Rendering Contractors commitment:**

Here at Everdell's Plastering/Rendering we care about the environment and are aware that things need to change...

**We are a Sussex based plastering/drylining trades contractor who believe in a quality-finished product. This is achieved by a team of people who strive to continually improve the way we go about our business. In line with our customers expectations we will support endeavours to raise standards of workmanship and practice in the industry. To this end, we believe in the value of trained and qualified workforce.**

**Protection of the environment in which we live and operate is part of Everdell's Plastering/Rendering values and principles of which we consider to be sound business practice. Care for the environment is one of our key responsibilities and an important part of the way in which we do business.**

We recognise that almost all the activities of a business or an individual have some impact on the environment. Our goal is to reduce the impact of our company by developing an Environmental Management System.

*Our Environmental Management System will ensure that we:*

- Manage and minimise environmental risks identified in our activities
- Minimise waste and provide a sustainable alternative to landfill for the secure disposal of materials, equipment and waste used or created by the company.
- Comply with all relevant environmental legislation, regulations and approved codes of practice.
- Encourage meetings for our team members so that we all work in accordance with this policy and with an environmentally aware ethos
- Enhance awareness of relevant issues among customers, subcontractors and others to minimise their environmental impact.
- Encourage sustainable development through business example and voluntary endeavours within the local community.
- Support the local organisations in maintaining the biodiversity of our environment through regular donations.
- Monitoring and continuously improving our environmental performance.
- Working to the COVID 19 guidelines.

The policy statement will be regularly reviewed and update as necessary. The management endorses these policy statements and is fully committed to their implementation

***Plastering Services you can trust....***
