

# SBI Verandas

Transform your patio or deck

Enjoy your patio day or night

Energy consumption 2.4w

Energy consumption 35w

## SMD or Halogen Integrated Spot Lights

SMD lighting gives the same light output as traditional incandescent or halogen lamps, with only 10% of the energy used.

- SMD lighting is 50,000 hours, which means an average consumption of SMD lamp lasts 30 years!
- SMD lighting is made of environmentally friendly materials and contain no harmful substances.
- SMD lighting is not hot, reducing the risk of fire risks to a minimum.
- Spreading the angle of the light by a 120 degrees, the light is optimally distributed.
- Our SMD RoHs lighting meets the CE mark.
- SMD lighting has very low energy consumption, so it is better for the environment .

# Integrated gutter & leaf guard

- SBI Gutter Guard is specially designed to ensure that leaves and other debris slide off the surface or simply blow away.
- SBI Gutter Guard is coated with a special UV protection to prevent damage from the Sun's harmful rays for longer life.
- Under all rain conditions the water flows straight through, ensuring maximum flow through to the down pipe
- Even the smallest of debris from the roof is blown or washed away.
- If you have trees near your home. SBI Gutter Guard stops you the hassle of cleaning out the gutter.

## The benefits of an SBI veranda at a glance:

- Never worry about the weather when you arrange a garden party or barbeque as you will have protection from the elements all year round
- Your frame work is made of durable aluminium so it is easy to clean & maintain
- You can choose any colour frame work to compliment your surroundings
- Your Veranda has a built in gutter so you don't have any unsightly pipe work to spoil the appearance
- Protect your expensive garden furniture with out the hassle of finding storage space at the end of the summer
- Your glazing is fully waterproof and offers UV protection from the suns harmful rays
- You can add spot lighting and heating to enable you to use your garden long after the sun has gone down
- Add screens to provide relief from the suns heat, glare or just to provide you with privacy
- Your Veranda provides you with many uses from a an alfresco dining area, Jacuzzi cover, out door play area, walkway cover or simply a place to sit and read a book
- The design of the Veranda lets you embody the out door way of life providing you and your family with plenty of fresh air
- You are using a company that has been in the awnings, blinds and canopies industry for over a decade and who's customers include blue chip companies
- Your personal installation team has been trained in the installation of SBI Verandas
- You have a 5 year warranty on the frame and glazing for peace of mind
- You are purchasing a quality Veranda Lux product that has been developed and produced by and in accordance with the following EN standards: EN 1990 + EN 1991: Load and deformation EN 1999: Requirements aluminium constructions
